Save thousands of dollars by dramatically cutting energy costs!

Wasting compressed air is a worldwide problem that can't be fixed with a bandage, a piece of chewing gum, or duct tape. If you follow these easy steps, EXAIR can help you make your system energy efficient so your company pays the lowest price possible for compressed air.

Six Steps To Optimizing Your Compressed Air System

- 1 Measure the air consumption to find sources that use a lot of compressed air.
- 2 Find and fix the leaks in your compressed air system.
- 3 Upgrade your blowoff, cooling and drying operations using EXAIR engineered compressed air products.
- 4 Turn off the compressed air when it isn't in use.
- 5 Use intermediate storage of compressed air near the point of use.
- 6 Control the air pressure at point of use to minimize air consumption.
