Blowoff Systems

Build Your Own System

Put together the best combination that suits your blowoff, cooling, drying or cleaning application. Select the model number that includes your choice of Air Nozzle or Jet, a length of Stay Set Hose, and a one or two outlet magnetic base.

1. Choose the Air Nozzle or Jet model.

Example: Model 1100 Super Air Nozzle

2. To include a Stay Set Hose, list the model of Stay Set Hose as a dash number after the Air Nozzle or Jet model. (Price will be the sum of both components.)

Example: A Model 1100 Super Air Nozzle with a 12" (305mm) Stay Set Hose is a Model 1100-9212. Price is \$113.80.

3. To include a One Outlet Magnetic Base, change the second digit of the dash number to a "3". For the Two Outlet Magnetic Base, change the second digit of the dash number to a "4". (Price will be the sum of all components.)

Example: A Model 1100 Super Air Nozzle with 12" (305mm) Stay Set Hose and One Outlet Magnetic Base (Model 9042) is a Model 1100-9312. Price is \$229.80.

Six Steps To Optimizing Your Compressed Air System

Save thousands of dollars by dramatically cutting energy costs!

Wasting compressed air is a worldwide problem that can't be fixed with a bandage, a piece of chewing gum, or duct tape. If you follow these easy steps, EXAIR can help you make your system energy efficient so your company pays the lowest price possible for compressed air.

1. Measure the air consumption to find sources that use a lot of compressed air.
2. Find and fix the leaks in your compressed air system.
3. Upgrade your blowoff, cooling and drying operations using EXAIR engineered compressed air products.
4. Turn off the compressed air when it isn't in use.
5. Use intermediate storage of compressed air near the point of use.
6. Control the air pressure at point of use to minimize air consumption.
